

## **HOME**

Suggest this could be a carousel of sliding images - 3 max?

Suggest using product shots for these - its what the viewer would expect.

2

I understand that not all of the photos were universally liked, but to put application or market sector images here would confuse the viewer - especially as there will be market sectors directly below too.

### Which Industries?

**Engineering & CNC** 

We can use the images already purchased from the brochure (but some will still need sourcing):

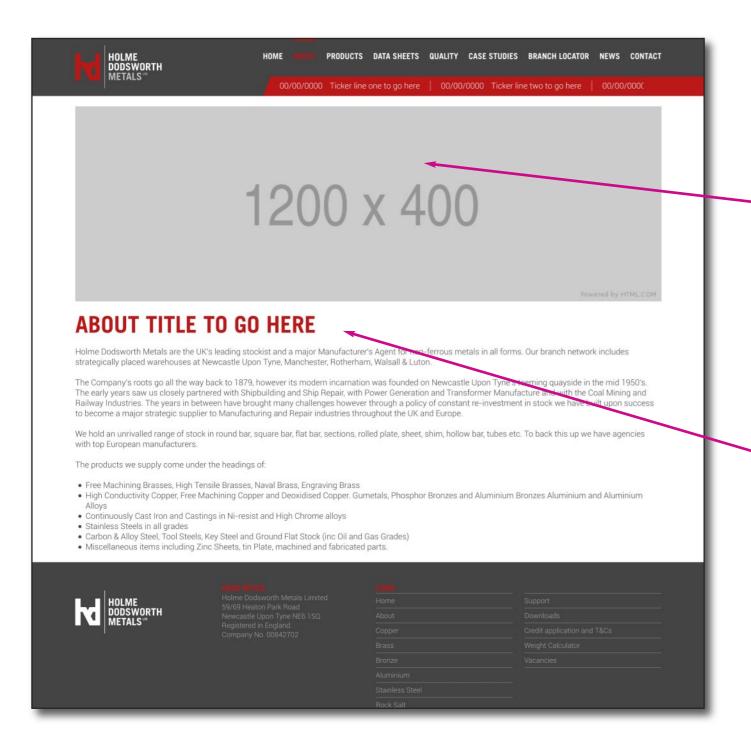

Marine & Shipbuilding

Sectors from rear of brochure that we do not have images to represent that we can source at £15 each

Tube Sheet & Heat Exchanger Medical Architectural Defence Lasercut & Fabrication

## **ABOUT**

## **COPPER**

ne Dodsworth Copper is sourced from the highest quality producers the world has to offer. Our range of alloys and s unmatched throughout the industry and we are able to offer excellent prices and lead times on all of our copper

widely in electrical, power generation, telecommunications, construction, automotive and a whole

a huge range of alloys and sizes that we can provide either from stock or on exceptionally good lead times

If, however you cannot find what you are g for please do not hesitate to contact our sales team who will be happy to hear from you and address your require

#### COPPER AND COPPER ALLOY SPECIFICATIONS

Copper is a medium strength, non-magnetic metal. It has excellent ele and thermal conductivity properties and has a comparatively low cost. In its purest form it is soft and malleable but the in duction of alloying elements provides many industrial and commercial uses.

Holme Dodsworth's extensive range of copper product types includes a variety of copper allows will corrosion resistance that makes them ideal for the production of everything from valves and pipe extrusions. As a good conductor copper is the metal of choice for the manufacture of electrical but s which have a high level of switchgear industry as well as wire for printed circuit boards.

Other uses include domestic cookware and various bio-medical applications.

# **DATA SHEETS**

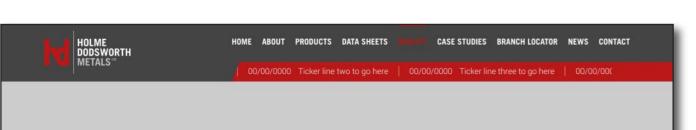

**Image** client to advise as to which image to use here.

Suggest we could use a generic image such as the brochure cover below showing shapes.

When clicking through to the data sheet pages - then the banner image would resort to the material image as used on each product page.

## **QUALITY**

UKAS Accredited Quality Management System to BS EN ISO 9001: 2008 Registration No 10641/5 (NQA)

Holme Dodsworth Metals Ltd is the country's leading independent stockist and a major Manufacturer's Agent for non-ferrous metals in all forms. We operate a bespoke stock management system which links our various units and divisions. The Company is accredited to BS EN ISO9001 as a supplier of assessed capability.

As such we have accepted a commitment to provide materials of the highest quality and to consistently meet or exceed Customer's expectations of service levels. Our Quality management System plays an essential role. It both defines the Quality Expectations and provides the tools for quantitative analysis of our performance against these goals. Management reviews are held on a regular basis and ideas for improvement are seized upon.

Equally important however is the quality of our people. Established over 50 years ago by the present Chairman, the Company is now run with great competence by the 'next generation'. Our Managers are knowledgeable and well qualified individuals with a fund of experience in our industry. Our Quality Management Team have a wealth of background experience and we have well trained and long serving staff at all levels.

Above all we hold an unrivalled range of stock.

Our mission is to give 100% Customer Satisfaction, 100% of the time.
